Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, Tailwind CSS, ShadCN, Acernity UI

Databases: MySQL, MongoDB

Tools & Deployment: Git, GitHub, Maven, Postman, Docker (Basics), CI/CD Fundamentals, Plesk, FTP

WORK EXPERIENCE

Technoriya eTechnologies Pvt Ltd. | CBD Belapur, Navi Mumbai | May 2024 – Present

Full Stack Developer

Developed and maintained production-grade web applications using React, Next.js, and TypeScript. Built reusable UI components, implemented responsive layouts, integrated REST APIs, and managed production deployments and releases using Plesk.

TCR Innovation | Panvel, Navi Mumbai | Nov 2023 – Apr 2024

Jr. Web Developer

- Received hands on training in Python and Django fundamentals, including project structure and Django workflow.
- Worked on basic Django projects involving models, views, templates, and form handling
- Gained exposure to backend concepts such as URL routing, validation, and database interaction

Spark Foundation | Singapore (Remote) | Aug 2023 – Oct 2023

Web Development - Intern

- Developed responsive web pages using HTML, CSS, JavaScript and basic PHP.
- Implemented client-side form validation and basic backend connectivity
- Strengthened core concepts of web development through guided tasks and project submission

PROJECTS

Digital Marketing Agency Platform

Tech Stack: Next.js, React, TailwindCSS, ShadCN, Aceternity UI, Stripe

- Built a responsive and SEO-friendly frontend using Next.js with optimized routing and component structure.
- Designed scalable UI components using TailwindCSS, ShadCN, and Aceternity UI, contributing to high Lighthouse performance scores.
- Implemented frontend Stripe checkout flows and coordinated with backend teams for payment and order handling.

Invoice Generation System

Technologies: Java, Spring Boot, Hibernate, MySQL

- Developed a desktop application for generating GST-compliant invoices with customer and product management features.
- Designed custom invoice layouts with automatic GST, subtotal, and grand total calculations.
- Implemented PDF export and print functionality for invoices.
- Built the user interface using Java Swing and integrated MySQL using JDBC and Hibernate.

UFF – Job Register System

Technologies: Java, Spring Boot, Hibernate, JavaFX, MySQL

- Rebuilt an existing job register application with a modern JavaFX interface to improve usability.
- Added PDF export functionality for job records to reduce manual reporting effort.
- Resolved Hibernate session and transaction handling issues to ensure stable database operations.
- Followed a layered architecture to maintain clean separation of concerns.

E-Commerce Website – Wrapper Shop | Freelancer

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Built a full-stack e-commerce web application with a dynamic product catalog, filtering, size-based pricing, and cart functionality.
- Integrated online payment gateway for secure transactions and implemented order placement with payment status tracking.
- Integrated automated order confirmation emails using PHPMailer and managed order workflows end-to-end.
- Designed a responsive, user-friendly UI using Tailwind CSS and optimized MySQL database schemas for performance.
